How GPRS works

General Packet Radio Service · From a mobile data request to the internet and back.

01 / SETUP

Attach & activate

Register the device, then establish a packet data session.

02 / TRANSFER

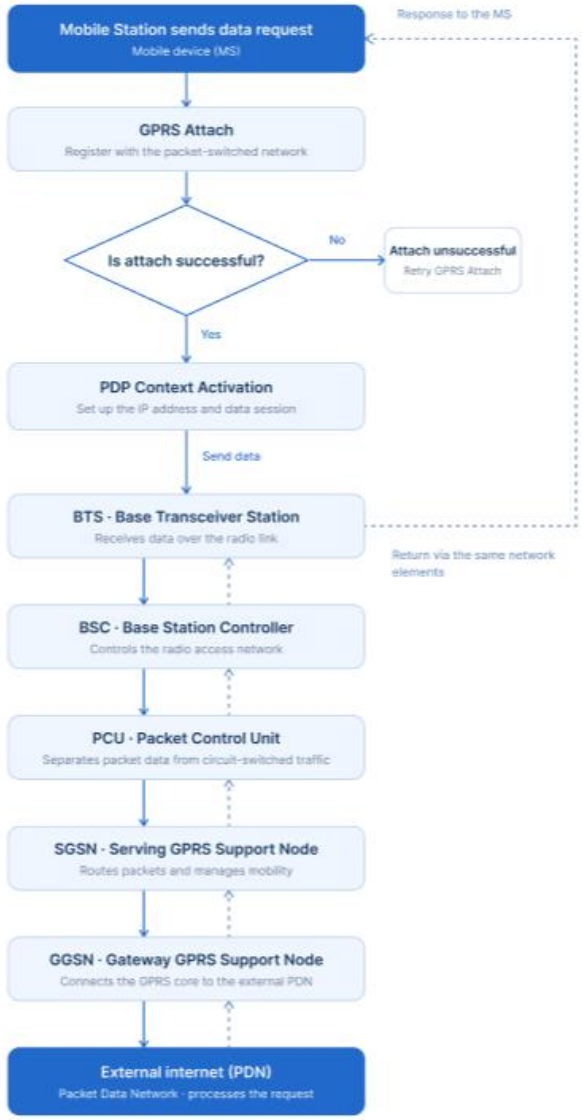

Through the network

Follow the solid arrows down to the external internet.

03 / RESPONSE

Same path, reversed

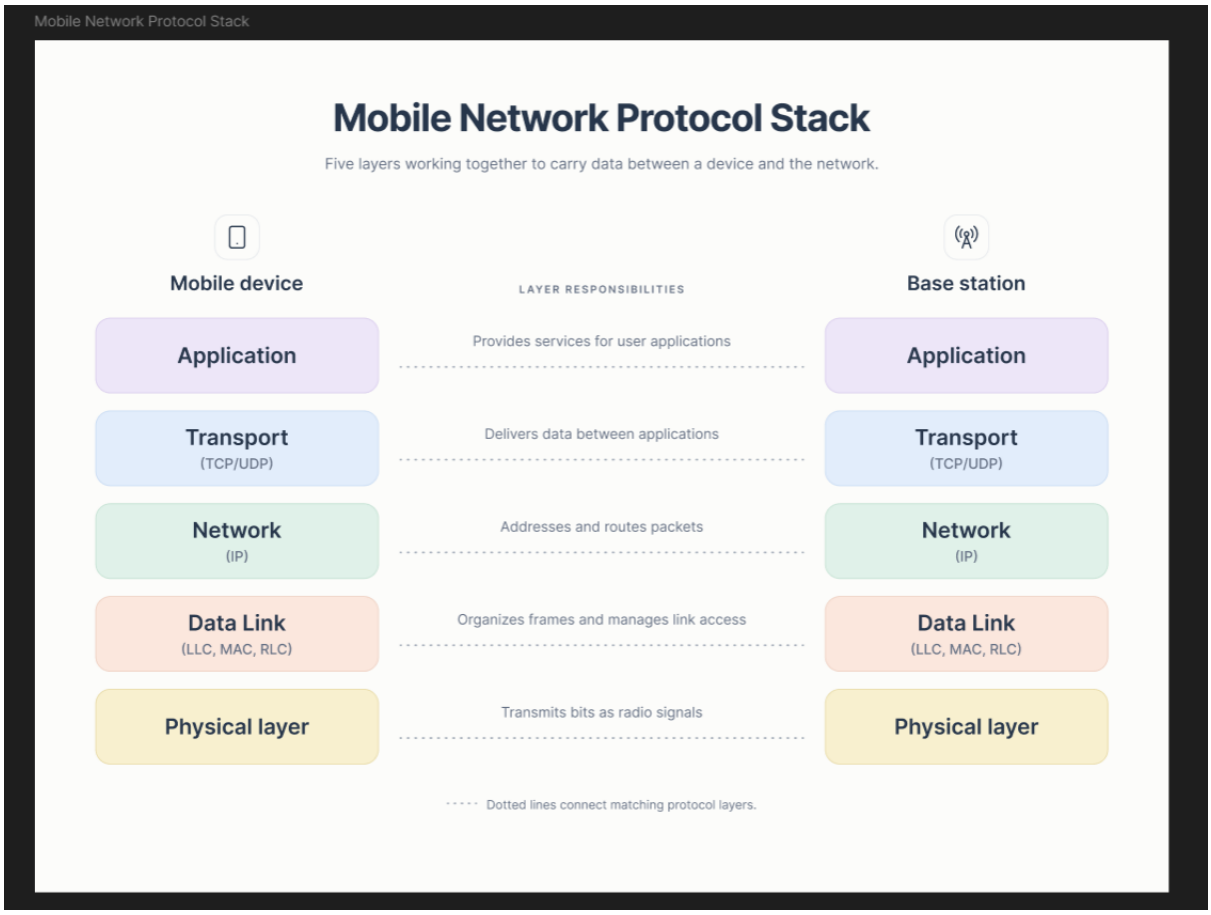

Follow the dashed arrows up through each network element to the mobile.

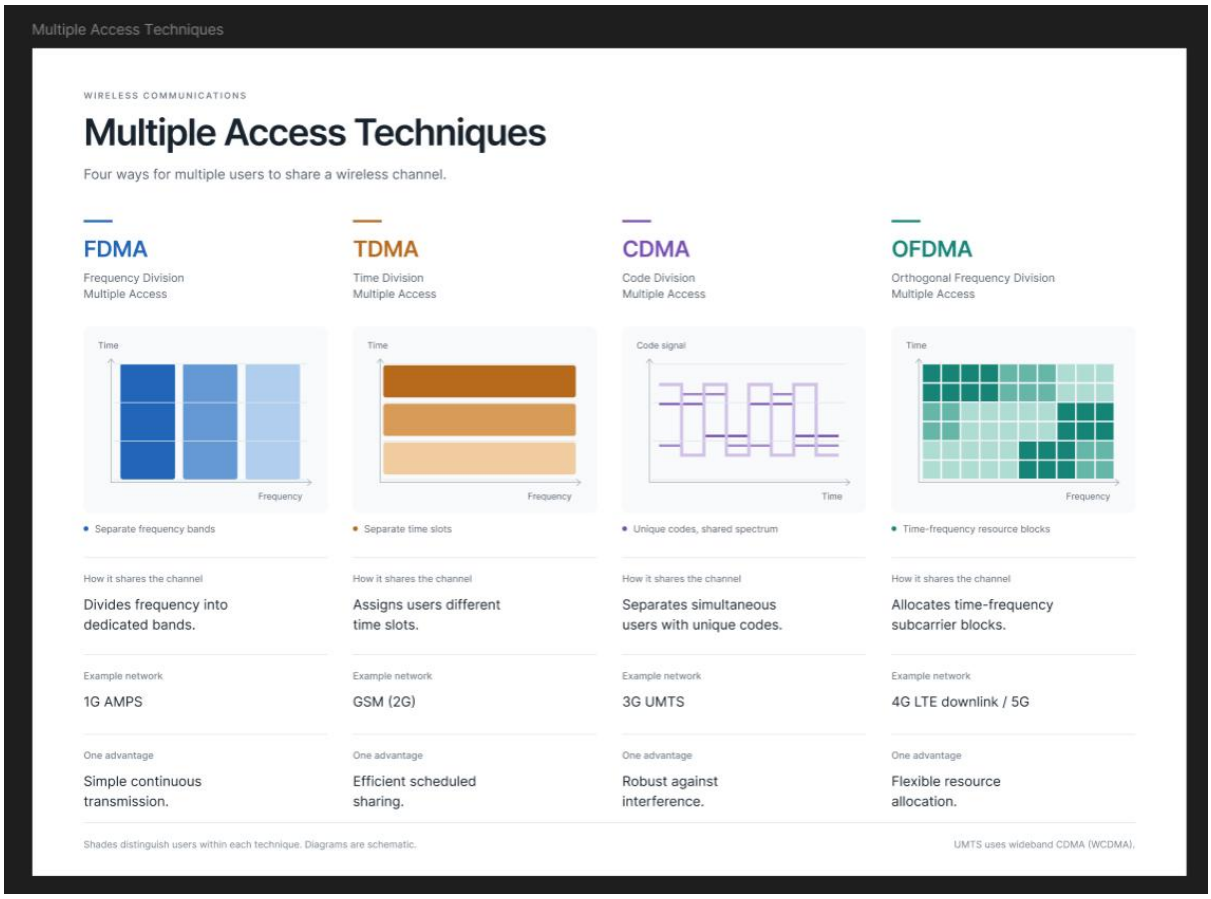

Request / outgoing data Response / incoming data

Return route: PDN → GGSN → SGSN → PCU → BSC → BTS → Mobile Station. Attach and activation are setup steps.
